117F MONSTAIR BOOG." Prenchinan's Experience With Crabs of

A party of Frenchmen who were out sailing on Jamaica Bay were caught in sulden squall the other night and compelled to stop over at one of the small hotels at Rockaway Beach One of them, a late arrival, was greatly exercised over the discomforts of the place and complained bitterly about

the lack of elegance in the fittings and the inadequacy of the menu to satisfy a refined palite. A member of a fishing club who had been out crabbing, countrously gave up his room to the foreigner, and shared the bed of one of his companions. But in vacating the apartment he left behind his fish

ng tackle and a basketful of the crabs he had caught
The Frenchman sought the chamber inther late, and retired at once Dur-ng the night he awoke, and fancied he ne find a noise that was not the murmur of the surf on the beach beneath his

window He sat up and listened Yes He was sure of it then A strange, scretching sound. In a moment he was out of his bed, for it came from the floor underneath his feet and from different parts of it,

too In a night he groped for h matches and struck a light The with a vell he made for the door

basket in the corner had tilted over and released the crabs, which were strug chief about all over. In the gloom the frightened foreigner could hardly make out the appearance of the mis-

shapened creatures, and he reve stopped to investigate
they industry and if they stragglers

that of last year The Mackerels, with their gorgeous robes and floats, will pre-sent a scene of Oriental splendor Their costumes, many of them of univaled magnificence, have been made in Paris and are expected here in a day or two There will be about 450 men in line, 150 of whom will be mounted. There will be ten large floats in the procession and about a half-dozen hansom cabs. The hatter will be a burlesque on the cab system and nationalities. A negro driver will be shown driving an American and its adv, and a lanker driver will have a colored lady and gentieman for a load An Irishman will be driving a German and a German an Irishman, and so on Two of the floats will treat the subject of the leases of the Indian lands for cattle grazing purposes. On one float the cattle king will be in pos

session of the land and the Indian disappearing, and on the other Indian taking possession and the cattle king departing. Then there will be another float giving a graphic representation of painting the town red. The art in all, its intricacies will be shown and a clear illustration of this branch of masculine science given to the public. The other floats will be local hits and on subjects that will hit the public and some public officials very hard. TE ARE offering some very desirable BAR-GAINS in Ladies' and Gents' FINE WATCHES.

You will make a mistake if you buy a Watch without seeing us.

This is a class of goods in which we acknowledge no superiors.

We buy largely in all the American factories and obtain all the discounts to be had by any one, and have the advantage over most dealers in this section of the country to the extent of our discounts given for quantity, and an advantage over large city dealers in the smallness (comparatively) of our business expenses.

We show everything new in the watch industry, and take especial care that goods do not accumulate on our hands till they become undesirable stock.

In a recent issue of your journal you

say I have predicted that next winter

will be unusually mild. This is news

to me. With the great planets, Jupiter,

Saturn, Uranus and Neptune, all so

near their peribilion, a mild winter for

1886 is an absolute impossibility. In

fact the extremely cold weather now

prevailing in the Southern Hemisphere

teaches a lesson of an opposite signifi-

neighboring planets to our earth in-variably means cold. When our moon

is in perigee, and especially at the time of her conjunction, the temperature falls and this is increased when our

second satellite has a similar relative

position. The old theory that the nearer a planet is to the sun the hotter

it is is absurd! The opposite is the fact—the colder it is! All planets

must increaso in size and attractive power, either by meteors falling to their surface or by the increase in the number of their satellites, which

must mean that they are gradually receding from the sun. Our earth

s much further from the solar orb now

than she was at the glacial age, or

when our visible satellite first appeared in the Silurian eras, and Saturn is much

more distant than when he carried but

s single moon in his then smaller race-

course around the sun. Then as the

four great planets just mentioned are so near to us their attraction forces

our satellites nearer our primary, thus

increasing the attraction on our earth's

surface, and as a result densifying our
